

## 2016-2017 Home School Program

Month: February -- homework for older students or those wanting high school credit.

Adaptations are physical or behavioral traits that help the animal survive.

Research about owl adaptations. Owls have many physical and behavioral adaptations that make them great predators and allow them to be active at night and sleep during the day. How are owls different or unique from other birds? How are owls different or unique from other predators?

Create a table top display on a tri-fold board (you can get these at Walmart, Target, Office Depot) about owls and their special adaptations. On your board you will have the following: title, pictures of owls, labels for the pictures, diagrams or other illustrations showing adaptations, and text blocks explaining owl adaptations and unique owl behaviors. We will display your owl board in the Education or Visitor Center.
